**FRP/FRV  
Lining to Tanks,  
Pipelines and  
Metal  
Substrates**

**Glass Flake  
Coating to  
FGD and  
Pipelines**

**Glass Flake  
Coating to  
Valves**

**SUYASH COMPOSITE  
INDUSTRIES PVT. LTD.**

We, at Suyash Industries, were the pioneers in FRP/FRV lining work to tanks, pipelines and other metal substrates for many of our clients.

We have regularly been carrying out Glass Flake coating for high temperature and highly abrasive conditions. For special and critical operations like FGD operations for GGH and absorber and ducts, we have coated hundreds of square meters of the surface with Glass Flake coating for many clients.

Glass Flake coating to Fire pipelines has increased the life of the pipelines multi-fold with added corrosion and abrasion protection

We have also coated hundreds of valves with our Glass Flake coatings for leading Valve manufacturers and PSUs.

Suyash Industries is a registered MSME and ISO certified.
